

# Goldfish Graphing

## MATH ACTIVITY

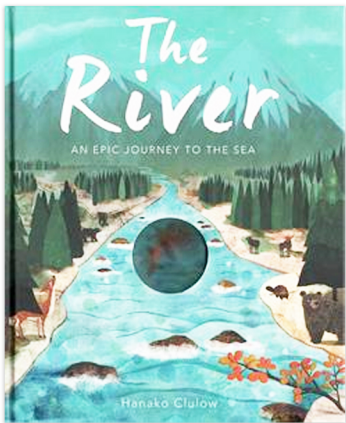

Hey there!

Thanks so much for downloading this graphing activity!

I'm Pam -- wife, mama of 6 kiddos, former 1st grade teacher, Usborne Books & More team leader, and the face behind "Keeping Life Creative." I'm crazy-busy and usually overwhelmed, but try to keep every-day life and learning creative through good books and fun projects.

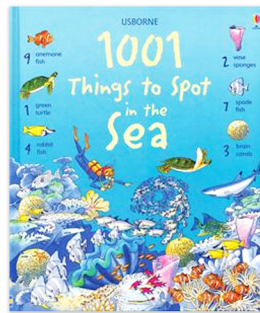

We love pairing themed projects with our favorite books. May I suggest a few titles?

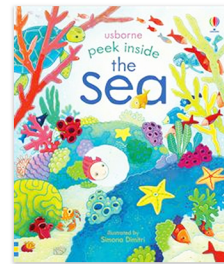

*The River*

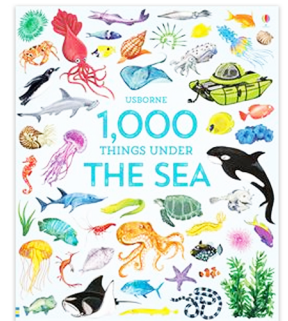

*Steve, Terror of the Seas*

*1001 Things to Spot in the Sea*

*Peek Inside the Sea*

*1,000 Things Under the Sea*

I'd love to be your "book lady!" Purchasing books through my shopping link helps support my family and the creation of printables like these. Thank you so much!!  Pam

# Goldfish GRAPHING

**Supplies:** Colored Goldfish crackers or fish candies, crayons, Goldfish graphing sheet

## Directions:

1. Print the graphing sheet.
2. Look at the colored fish crackers or candies and find a crayon that matches each color.
3. Use these colors to color the fish on the bottom of the graphing page.
4. Take a handful of fish crackers/candies and sort by color.
5. Place the fish on the graph in the column that matches each fish's color.
6. Discuss information you can learn from the graph such as:  
How many fish in are there in each column? Which column has the most?  
Which column has the least? How many more red than green, etc.
